Attached for your review are revised draft comments to replace the previous draft General Comments 1 and 2 re Tetra Tech EC Inc. and PRG Calculator. These are based on Techlaw comments, many phone calls with Lyndsey (Health Physicist) who has also talked with Stuart Walker several times, 2 Navy conference calls (one including DTSC/CDPH), a regulators-only call with CDPH and DTSC, and input from Brianna.

Lyndsey is also working on better language for General Comment 2.b. BPRG Users Guide, but I just put in placeholder language based on her discussions with Stuart late today.

I know this is very long, but I did not want to disrupt the numbering system for the rest of the comments that are not related to rad.

Judy, I know you also asked me to look at General Comment #6, but I'm sorry haven't done that yet. Maybe I can talk to you about what you're looking for.

Also, for your reference, I have attached 9 pages of references to work done by Tetra Tech EC Inc and the very few rad-related excerpts from the draft 5 Yr Review document.
